

Subarna Katwal

BCA Final Year | Aspiring AI Product Engineer

Kathmandu, Nepal | +977 9703901454 | subwrn@gmail.com | linkedin.com/in/subarnakatwal | github.com/nepnpc

PROFESSIONAL SUMMARY

Final-year BCA student building hands-on AI projects with Python, FastAPI, and LLM APIs (Groq / Llama 3). Practiced in agentic coding workflows using AI coding assistants (Claude, Cursor) to plan, scaffold, and ship full-stack features end-to-end, and designing autonomous agents that act on a schedule. Recently shipped an LLM-powered text humanizer and an autonomous LinkedIn posting agent running on GitHub Actions. Backed by Google Cybersecurity certification and active production support experience. Seeking an AI / ML internship to apply LLM orchestration, agentic systems, and backend skills on real-world problems.

EDUCATION

Bachelor of Computer Application (BCA)	2022 – Present
<i>Madan Bhandari Memorial College, Kathmandu, Nepal</i>	<i>Final Semester (8th)</i>
Focus: Network Security, Scripting, Database Management, Applied Programming.	
+2 Science (Computer Science Major)	2020 – 2022
<i>Pentagon International College, Kathmandu, Nepal</i>	<i>Completed</i>

FEATURED PROJECTS

Project Humanizer — FastAPI · Groq Llama 3 · spaCy · Python	2026
- Built an AI-driven text-humanizer API that rewrites machine-generated text into a natural, human voice using Groq-hosted Llama 3 with spaCy linguistic features. - Designed prompt templates and a FastAPI service layer with input validation, request batching, and structured JSON responses. - Delivered end-to-end via an agentic coding workflow — using Claude / Cursor to plan, scaffold, and iterate from spec to working endpoint. - Repo: github.com/nepnpc/project-humanizer	

- Built an autonomous LLM agent that drafts and publishes LinkedIn posts on a schedule, orchestrated via GitHub Actions cron workflows — a real-world example of agentic coding turning a spec into a deployed system.
- Designed post-history tracking (JSON state) so the agent reasons over prior runs to avoid duplication and keep tone consistent.
- Repo: github.com/nepnpc/linkedin-agent

TECHNICAL SKILLS

AI / LLM	Groq API, Llama 3, prompt engineering, LLM agent design, spaCy (NLP basics)
Agentic Coding	Claude (Anthropic), Cursor, Copilot — pair-coding workflows, agent-driven debugging, spec-to-PR delivery, autonomous task agents
Languages	Python (Intermediate), SQL, Bash, Kotlin (basics)
Backend	FastAPI, REST API design, JSON state management
Security & Net	Network Fundamentals, Risk Assessment, Wireshark, Nmap (Basic)
OS & Cloud	Linux (Ubuntu / Kali) – Intermediate, Windows, Google Workspace
DevOps & Tools	Git, GitHub Actions (cron workflows), VS Code, MySQL, Microsoft 365

CERTIFICATIONS

- **Google Cybersecurity Professional Certificate** — Coursera
- **Programming for Everybody (Python)** — Coursera
- **Databases and SQL for Data Science** — Coursera
- **Introduction to Cybersecurity** — Coursera

EXPERIENCE

Technical Support & Data Associate — *Profusion Tech Pvt. Ltd., Kathmandu* 2023 – Present

- Provide first-level technical troubleshooting and end-user support, ensuring minimal downtime.
- Manage optical procurement data entry and document resolution workflows for future reference.
- Identify and escalate complex system issues to senior technical staff.

Content Moderator — *Yodha, Kathmandu* 2022

- Reviewed user-generated content to ensure compliance with community safety guidelines.
- Maintained high accuracy in QA checks, contributing to a safer user environment.
